THERMAL INSULATION PRODUCTS

Woodfiber

- Made from leftover wood from sawmills
- Thermal conductivity 0,038W/mk
- Fire resistance E,s2-D0
- Breathable, can take moisture in and dry out
- Especially to the wooden buildings
- For example living houses max 2 floor high

Cellulose

- Made from recycled newspaper
- Thermal conductivity 0,037W/mk
- Fire resistance B,s2-D0
- Breathable, can take moisture in and dry out
- Especially to the buildings where is needed to have combination of high thermal conductivity and fire resistance
- For example school or daycare buildings max 2 floor high

Glasswool

- Made from recycled glass
- Thermal conductivity 0,041W/mk
- Fire resistance A1,s2-D0 (nonflammable)
- Especially to the buildings where is needed to have high fire resistance or nonflammable structure
- For example block of flats over 4 floor high
